Work Experience

Kiosko - Azure Backend Software developer (Node.js, TS)

10/2024 - Present

- Led backend development of the Loyalty Program, serving 480k+ daily users with 60+ req/s at 99.9% uptime.
- Engineered a Redis caching solution to reduce Salesforce API consumption by 53% and API response time by 42%, successfully saving over 800k+ daily API calls.
- Architected Salesforce integrations and a dual migration strategy (legacy + new platforms in parallel via custom interface), ensuring zero downtime.
- Implemented secure authentication flows (JWT lifecycle + OTP) aligned with banking standards for the Loyalty Wallet app integrated with a debit card SDK.
- Built CI/CD pipelines (Azure DevOps/GitHub Actions), optimized PostgreSQL pipelines, and delivered maintainable services with OOP and SOLID design principles; mentored peers and ensured reliable releases under pressure.

iNBest - Cloud-Based Backend Software Developer (Python - Flask/Django)

04/2023 - 10/2024

- Managed cloud infrastructure on AWS and Azure, deploying backend services for high availability.
- Developed RESTful APIs and occasional SOAP endpoints, enabling seamless integration with web and mobile applications.
- Designed and implemented PostgreSQL/MySQL databases, leveraging ORMs for efficient data interaction; created flowcharts and ER diagrams for architecture clarity.
- Automated unit, integration, and deployment testing within Agile/SCRUM methodology, maintaining code quality and scalability.
- Applied best practices in OOP, design patterns, and software engineering principles.

Nextiva - Technical Support Specialist.

06/2022 – 03/2023

- Help Desk/IT support for VOIP/Network issues.
- Advanced Network checks, DHCP/DNAT troubleshooting.
- Hardware provisioning, Salesforce, and software support.

Technical Skills

Languages: Python, TypeScript/JavaScript, SQL, Java

Frameworks & Libraries: Django, Node.js, Flask, Express.js, SQLAlchemy, GraphQL, Pandas

Databases: PostgreSQL, MySQL, MongoDB, ORMs

Cloud & DevOps: Azure, AWS, Docker, CI/CD, GitHub Actions, Serverless Architecture, Microservices

Other Tools: Redis, Linux, Bash, Git, Agile/SCRUM practices

Education

Codecademy – Back-End Engineer - Professional Certification 

Harvard University, Online CS50: Introduction to Computer Science Certification
